Professional Summary

Software Engineer with strong foundations in Data Structures, Algorithms, and backend system design. Experienced in building scalable full-stack applications using Node.js, React, and PostgreSQL. Proven ability to develop secure RESTful APIs, optimize system performance, and design real-time systems using WebSockets and Redis. Passionate about solving complex problems and delivering high-performance, reliable software solutions in fast-paced environments.

Education

M.Sc. in Computer Applications – Dr. D. Y. Patil College, Pimpri Chinchwad | 2024–2026
B.Sc. in Computer Science – KTHM College, Nashik | 2021–2023 | SGPA: 7.01

Experience

Full Stack Developer Intern – Assured Business | Jan 2026 – April – 2026 |
MERN Developer Certification – Fortune Cloud Technology | Aug 2025 – Jan 2026

Technical Skills

- Languages: Java, Python, JavaScript, C
 - Core CS: Data Structures, Algorithms, OOP
 - Backend: Node.js, Express.js, Fastify, REST APIs, JWT Authentication, OAuth, Redis
 - Frontend: React.js, Next.js, Redux
 - Databases: PostgreSQL, MySQL, MongoDB
 - AI / ML & Search Systems: Machine Learning, AI Models, Retrieval-Augmented Generation (RAG), Vector Embeddings, Semantic Search, Hybrid Search (Keyword + Vector), Reranking
 - Tools & Technologies: Git, GitHub, Vercel , Docker (Basics) , AWS
-

Projects

1 . Phishing Detection System (live)

- Built a full-stack phishing detection system using **React.js**, **Node.js**, and **Python ML**
 - Integrated REST APIs connecting frontend, backend, and ML services
 - Implemented real-time detection of malicious URLs and email threats
 - Designed responsive UI for threat visualization and monitoring
 - Ensured secure data handling with optimized backend performance
 - Improved detection accuracy through data preprocessing and ML tuning
-

2 . Zapiya – AI Agent Platform

- Built a full-stack AI agent platform using **Node.js**, **Fastify**, **Next.js**, **PostgreSQL**, and **Redis**
- Implemented real-time **streaming chat** for low-latency conversational experience
- Developed **RAG** pipeline for context-aware AI responses using external knowledge
- Designed hybrid search combining keyword and **semantic vector** search
- Integrated Redis caching to optimize performance and reduce latency
- Built scalable Fastify backend with authentication and agent **CRUD** APIs
- Developed responsive Next.js UI for chat interface and agent management .
